

ENERGY OASIS

Case Study

Yorwaste - Northallerton

Customer: Yorwaste
Technology: LED lighting
Funding: CapEx
Outcomes: Energy Savings and improved light quality

PROJECT OVERVIEW

Yorwaste has opted for LED lights to deliver energy savings and improve light quality.

PROJECT BACKGROUND

Yorwaste is the largest waste management company in North Yorkshire. Energy Oasis has worked with Yorwaste on several projects, installing energy monitoring and intelligent LED lighting at its Tancred site. Their phased approach to upgrading their sites continued with their Head Office in Northallerton.

THE SOLUTION

A grand total of 115 lights were installed across the offices. The majority having their own controls including PIR motion sensors.

RESULTS AND OUTCOME

The new lighting solution will save at least 85% on their annual spend. There are 14% less fittings.

CUSTOMER FEEDBACK

“Yorwaste Ltd have been working with Energy Oasis for the past 2 years on ways to reduce our energy consumption. The first project was the re-lamping of one of the business Waste Transfer Station. This proved to be an extremely difficult project, but the professionalism and tenacity of the Energy Oasis team meant a successful delivery and an 85% reduction in our energy consumption. ”

Kevin Smith, Head of Corporate Services.
